# Anas Ahmad AlFasatleh

## Senior Full-Stack Web Developer

📞 +962 79 836 2101 | 📧 anasalfasatleh@gmail.com | 📍 Madaba, Jordan | 🔗 linkedin.com/in/anas-alfasatleh

## PROFESSIONAL SUMMARY

Senior Full-Stack Web Developer with over 4.5 years of experience in designing, developing, and maintaining scalable and secure web applications. Strong expertise in ASP.NET Core Web APIs, modern frontend frameworks including Angular and Svelte/SvelteKit, and enterprise-grade system architecture. Experienced in building microservices-based systems, optimizing application performance, and designing efficient database solutions. Proven ability to deliver high-quality, maintainable software, contribute to security-critical systems, and mentor developers.

## TECHNICAL SKILLS

Backend: ASP.NET Core Web API, .NET Platform, RESTful APIs, Microservices & Monoliths

Frontend: AngularJS, Angular (2+), Svelte, SvelteKit, TypeScript, HTML5, CSS3

Databases: SQL Server, PostgreSQL, MongoDB, Redis

Architecture: System Design, API Design, Performance & Scalability Optimization

DevOps & Tools: Docker, AWS, DigitalOcean, Git, CI/CD, Agile

AI Tools: Claude, Cursor

## PROFESSIONAL EXPERIENCE

### Senior Full-Stack Developer — Dalil Information Technology (Remote, UAE)

September 2025 – Present | Security & Border Management Systems

- Designed and developed secure, scalable ASP.NET Core Web APIs for border management and security systems.
- Built and maintained modular architectures ensuring high availability, performance, and system resilience.
- Developed modern frontend applications using Svelte/SvelteKit.
- Designed and optimized complex database schemas.
- Conducted code reviews and mentored developers.

🏆 Employee of the Month – Awarded in the third month for outstanding performance.

**Full-Stack Developer → Senior Full-Stack Developer — Ertikaz Solutions (Remote, KSA)**

January 2023 – September 2025 | Logistics, Financial, Inventory & HR Systems

- Developed and maintained scalable ASP.NET Core Web APIs for enterprise business processes.
- Built responsive frontend applications using Angular (2+).
- Designed and optimized relational database schemas.
- Improved system performance through query optimization.

**Full-Stack Developer — Tahaluf Al Emarat Technical Solutions (Remote, UAE)**

January 2021 – December 2022 | Government Systems

- Contributed to the development of government web systems using .NET and ASP.NET Core.
- Implemented backend business logic and APIs following clean architecture principles.
- Developed frontend components using AngularJS and Angular.
- Worked with EF Code First and stored procedures.

🏆 Employee of the Month – Awarded in the 6th month.

## EDUCATION

BSc in Computer Science – Al-Balqa' Applied University (September 2017 – June 2021)

## LANGUAGES

- Arabic: Native
- English: Professional Working Proficiency
